**This text is part of our website**

Stablex is known as a major company in the treatment of industrial wastes and contaminated soils and is dedicated to putting science to work for our customers, our community and the environment.

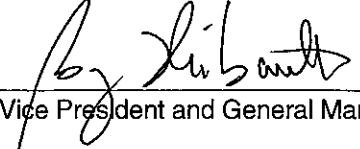

To do so, Stablex is committed to maintain a quality management system registered to the current ISO 9001 standards, according to the following objectives:

- To focus its activities and its resources to understand and meet the needs and expectations of customers
- Providing appropriate training and resources appropriate to its employees
- Analyze, review and continuously improve its processes, its services and the efficiency of its management processes
- Diagnose and improve its management practices

In a spirit of continuous improvement, Stablex's management team annually determines quantifiable targets to achieve in relation to its quality objectives.

This policy applies to all persons involved in its activities.

The Vice President and General Manager is responsible for the review and implementation of this policy.
