Stablex is known as a major company in the treatment of industrial wastes and contaminated soils and is dedicated to putting science to work for its customers, community and the environment.

To do so, Stablex is committed to maintain an environmental, health and safety (EHS) management system registered to the current ISO 14001 standards. Thus, the EHS prevention elements are integrated to the existing management system.

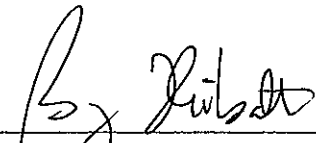

To achieve this, Stablex is committed to:

- ↪ Respect the laws and regulations applicable to health, safety and environment.
- ↪ Implement and continuously improve its operating procedures to reduce the risks to the health and safety of persons and to prevent pollution.
- ↪ Promote and provide training regarding to the health, safety and environmental aspects.
- ↪ Demonstrate leadership in terms of environmentally sound management and protection of the environment.
- ↪ Maintain appropriate and effective capacity to respond to emergencies.
- ↪ Take into account health, safety and environmental aspects in its business decisions.

In a spirit of continuous improvement, Stablex's management team annually determines quantifiable targets to achieve in relation to its EHS objectives.

This policy applies to all persons involved in its activities.

The Vice President and General Manager is responsible for the review and implementation of this policy.

Vice President and General Manager
